- Gurgaon, Haryana. India

Experienced Full-Stack Developer and Cloud SME with High-Level Proficiency and Experience in Spearheading the Planning, Design, Development, Implementation and Management of complex software solutions.

Technology Proficiency

.NET Core Microservices React Node.js Angular Javascript Ionic Framework Xamarin SQL **NoSQL AWS Microsoft Azure**

Certifications

Microsoft Certified: Azure Developer Associate

December 2020 - December 2022

AWS Certified Developer -**Associate**

■ July 2020 - July 2023

Educational Qualifications

B.Tech, Computer Science and Engineering

Gurgaon Institute of Technology & Management

= 2012 - 2016

Senior Secondary 12th

St PBN Public School, Gurgaon

= 2012

Higher Secondary 10th

Blue Bells Model School, Gurgaon

= 2010

Professional Experience

Senior Engineer

McKinsey & Company

April 2021 - Present

> Apply high-impact technical solutions to translate Business Requirements into robust applications that transcend high performance, stable and scalable results.

Principal Engineer

Condeco

April 2021 - Present

- > Apply high-impact technical solutions to translate Business Requirements into robust applications that transcend high performance, stable and scalable results.
- > Responsible for Prototyping and Formulating 'Proof of Concepts' (POCs) to ensure best possible solutions and transform them into Production Level design following Best-Practices and Clean Code Architecture.
- > Managing complete Application Lifecycle including Requirement Analysis, Pre-Development, Development, Testing and Deployment with occasional Post-Release improvements and maintenance.
- > Understand product requirements, formulating Estimate Document including End-To-End Delivery Timelines with Release Phases and supporting information.
- > Responsible for Prototyping Skeletal UI Mockups for the design team to implement Actual Wireframes.

Senior Engineer

Nagarro

■ December 2019 – April 2021

- > Design and Development of Web and Cloud based applications for clients associated with Nagarro - with expertise in various domains like E-Commerce, Employee Management, Inventory System etc.
- > Building Modern Hybrid Front-End applications for Web/Mobile using Angular and Ionic framework to deliver a seamless Cross-Platform User Experience.
- > Building Applications from ground zero based on Microservices Design Architecture, using .NET Core meeting robust standards following Best-Practices by adapting Modular Approach in designing the Services following SOLID Design Principles.
- > Construct End-To-End CI/CD pipelines using Modern Cloud Computing concepts based on PaaS Ideology involving Resource Provisioning, Building and Deployment of the Application with support of Automated Scaling, Robust Monitoring, Automated Alert Systems etc.
- > Designing Database Architecture based on Code-First/DB-First Approach following the Repository Pattern using EF Core and SQL Scripts for Creating Tables Schema structure, Stored Procedures (SPs) etc.

Software Engineer

Condeco

September 2018 – December 2019

- > Design and Development of Condeco's Workspace Management Platform, Condeco Enterprise – a suite of connected workplace tools integrates meeting room software and desk booking software, together with elegant touch screens for a truly pioneering solution that will transform your workplace today.
- > Building Highly Scalable and Extendible Microservices using both Serveless and Traditonal Paridigms.
- > Responsible for DevOps Infrastructure Creation/Maintenance including CI/CD Pipelines using YAML, ARM Templates, Power shell and Azure CLI.
- > Responsible for Documenting all the Application Level Changes and Enhancements including Data-Flow-Diagrams (DFDs).
- > SQL Architecture Design: Writing Stored Procedures (SPs) and building SQL agent jobs.

Associate Software Engineer

Gartner

Database.

May 2017 - August

2018

- > Design and Development of CEB, now Gartner's Survey Platform ClearForce a next generation employee engagement survey and reporting SaaS product suite using Microsoft Technologies.
- > Involved in various bug fixes and responsible for enhancements in both UI and
- Functional areas. > SQL Architecture Design: Writing Stored Procedures (SPs), building SQL agent jobs to automate certain key aspects of interaction between the Tool and
